Yogyakarta, Indonesia

I am a Fullstack Developer with a strong specialization in UI/UX Design and proven experience in building scalable web applications, operational dashboards, and database systems. Before graduating, I established a solid professional track record delivering end-to-end frontend and backend solutions using Laravel, PHP, React, JavaScript, and Tailwind CSS. Leveraging a deep passion for user-centered design—highlighted by winning a national UI/UX design competition—I excel at bridging the gap between aesthetic usability in Figma and high-performance technical architecture. I am highly dedicated to creating efficient, problem-solving digital products while simultaneously driving organic growth through targeted SEO optimization.

Work Experiences

PT Arsa Jaya Prima - Yogyakarta, Indonesia

Feb 2025 - Present

Fullstack Developer + SEO Analyst

A Yogyakarta based management consulting firm specializing in occupational health and safety (K3) and soft-skill training. Officially licensed by KEMNAKER and BNSP, the company provides nationally recognized certifications for various government and private industrial sectors.

- Spearheaded the end-to-end development of internal systems, including a marketing/operational dashboard and a staff duty travel tracking system (Surat Perjalanan Dinas), streamlining administrative workflows for company staff.
- Improved website performance and responsiveness using React and Tailwind CSS, effectively reducing page loading time by 30–40% across desktop and mobile platforms.
- Designed and implemented 5+ REST APIs and scalable backend workflows using Laravel, enabling seamless data synchronization between Google Spreadsheets and the core web system.
- Collaborated tightly with a cross-functional team of 4 members to deliver multiple web projects, maintaining a 100% on-time delivery rate that aligned with specific client requirements.
- Elevated organic search visibility for arsatraining.com by optimizing technical SEO architecture, successfully achieving and maintaining a Top 10 ranking on Google search results.

PT Faltek Cahaya Indonesia - Semarang, Jawa Tengah, Indonesia

May 2024 - May 2025

Fullstack Developer

An information technology and software development company based in Semarang, providing digital solutions and technical services.

- Developed a scalable Financial Management Information System using Laravel and PHP, streamlining transaction workflows and reducing manual data entry time by approximately 35-40%.
- Served as a core developer on 2+ contractor company web-based systems, enabling secure financial reporting and data management for over 50 internal users.
- Built, maintained, and deployed 10+ dynamic application features utilizing JavaScript, HTML, CSS, and Tailwind CSS to enhance core platform functionalities.
- Bridged the gap between design and development by structuring responsive, user-friendly UI/UX interfaces, which improved internal staff software adoption rates by 25%.
- Collaborated within an Agile development team of 5 to debug code, optimize application performance, and execute seamless database deployments for multiple ongoing projects.

Bias Promosindo Jaya - Yogyakarta, Indonesia

Jan 2023 - Apr 2023

Project Manager (Internship)

A comprehensive outdoor advertising agency providing end-to-end promotional media services, including billboards, neon boxes, and videotrons. The company manages the entire lifecycle of outdoor campaigns, from planning and installation to maintenance, legal permits, and taxes.

- Led the end-to-end development of a company profile website, coordinating a technical team of 3 developers from initial planning phase to live deployment.
- Managed project timelines, task delegations, and workflows using project management tools, ensuring 100% of development milestones were met within the 4-month internship period.
- Assisted in comprehensive UI/UX planning by creating 15+ wireframes and structuring website navigation, driving a more intuitive user experience and longer session durations.
- Facilitated weekly stakeholder communication meetings to align technical deliverables with overarching business goals and promotional media strategies.
